	Proficiency Level
Section 1: Organizational Strategic Planning and Management	25%
Analyze the organization's strategic planning process and its integration with the risk management strategy, including but not limited to:	Proficient
2. Examine how performance measures and controls are used by the organization to monitor the strategic plan and objectives, including but not limited to:  • financial  • operational  • qualitative versus quantitative  • productivity  • quality  • efficiency  • effectiveness	Proficient
<ul> <li>3. Examine existing organizational behavior (how individuals, groups, and organizations behave; tone at the top; etc.) and performance management techniques and their impact on the organization's culture, including but not limited to: <ul> <li>traits</li> <li>organizational politics</li> <li>motivation</li> <li>job design</li> <li>rewards</li> <li>work schedules</li> </ul> </li> </ul>	Proficient
4. Describe management's effectiveness to lead and its impact on the organization's culture, including but not limited to:  • mentoring • coaching • providing constructive feedback • guiding people • building organizational commitment • demonstrating entrepreneurial ability	Basic

			, ,
	5.	Identify the risk and control implications of different organizational	Basic
1		structures, including but not limited to:	
		centralized versus decentralized	
		flat versus traditional	
		remote	
S	ectio	n 2: Common Business Processes	45%
	1.	Describe business processes and their risk and control implications,	Basic
		including but not limited to:	
		<ul> <li>revenue and expense recognition</li> </ul>	
		asset management	
		accounting	
		supply chain management	
		inventory valuation	
		accounts payable	
		procurement	
		• compliance	
		third-party risk	
	2.	Identify project management concepts, including but not limited to:	Basic
		<ul> <li>project plan</li> </ul>	
		• scope	
		• timing	
		• team	
		<ul> <li>resources</li> </ul>	
		cost management	
		• reporting	
	3.	Identify organizational change management concepts	Basic
	4.	Explain business continuity and disaster recovery concepts, including	Basic
		but not limited to:	
		business resilience	
		incident response plan	
		business impact analysis	
		business continuity plan	
		disaster recovery plan	
	5.	Recognize crisis management and business response concepts for	Basic
		crises, including but not limited to:	
		• riots	
1		social unrest	
		natural disasters	
		adverse media	
		financial crises	
		pandemic	
		L 2	

6.	Recognize finance and accounting concepts, including but not limited to:	Basic
	types of financial statements	
	• bonds	
	• leases	
	• pensions	
	intangible assets	
	research and development	
	consolidation	
	investments	
	fair value	
	partnerships	
	foreign currency transactions	
	capital budgeting	
1	capital structure	
7.	•	Basic
4.	horizontal analysis     horizontal analysis	Dasic
	vertical analysis	
	ratios related to activity	
	<ul> <li>profitability</li> </ul>	
	liquidity	
	leverage	
8.	Describe data types, data governance, and the value of using data analytics in business processes	Basic
9	Explain the data analytics process, including but not limited to:	Basic
0.	define objectives	Baolo
	obtain relevant data	
	normalize data	
	analyze data	
	communicate results	
Section	n 3: Information Technology	30%
A.	IT Control Frameworks and Information Security	
1.	Recognize the purpose and applications of IT control frameworks,	Basic
	including but not limited to:	
	• COBIT	
4	• ISO 27000	
	• ITIL	
	• NIST	

2.	Explain the purpose and use of common information security and	Basic
	technology controls, including but not limited to:	
	IT general controls	
	encryption	
	firewalls	
	antivirus	
	<ul> <li>passwords</li> </ul>	
	<ul> <li>multi-factor authentication</li> </ul>	
	• biometrics	
	digital signatures	
3.	Recognize principles of data privacy and their potential impact on data	Basic
	security policies and practices	
4.	Recognize data governance and data management concepts	Basic
5.	Recognize existing and emerging cybersecurity risks, including but not limited to:	Basic
	• hacking	
	• piracy	
	tampering	
	ransomware attacks	
	<ul> <li>phishing attacks</li> </ul>	
	deepfakes	
В.	Application and System Software	
1.	Recognize core activities in the systems development life cycle and	Basic
	delivery and the importance of change controls throughout the process,	
	including but not limited to:	
	requirements definition	
	design	
	developing	
	• testing	
	debugging	
	deployment	
	maintenance	
2.	Recognize the key characteristics of software systems and how they	Basic
	enable business processes and controls (automated and manual),	
	including but not limited to:	
	customer relationship management [CRM] systems	
	enterprise resource planning [ERP] systems	
	governance, risk, and compliance [GRC] systems	
3.	Recognize the risks related to systems and software integration and	Basic
	interface	

C IT Infrastructure and Operations	
C. IT Infrastructure and Operations  1. Explain basic IT infrastructure and network concepts and identify	Basic
potential risks and controls, including but not limited to:	Dasic
server	
virtual machines	
client-server configuration	
gateways	
• routers	
local area network [LAN]	
wide area network [WAN]	
virtual private network [VPN]	
cloud services and models	
Describe various IT roles, including but not limited to:	Basic
network administrator	Dasic
database administrator	
help desk     information acquite officer	
information security officer	
chief technology officer	<b>D</b> .
3. Recognize current and emerging technology practices and their impact	Basic
on the organization and control environment, including but not limited to:	
• smart devices	
internet of things [IoT]  Artificial intelligence  The second control of the second	
artificial intelligence	
blockchain	
digital currency and assets	
robotic process automation [RPA]	
generative artificial intelligence	
4. Explain IT processes and procedures in business continuity and	Basic
disaster recovery, including but not limited to:	
incident management	
backup	
recovery testing	
restoration
